EDUCATION

B.E (ECE) - Sri Eshwar College of Engineering CGPA : 8.7* (Upto 6th sem)	2021-2025
HSC - Sri Visalakshi Girls Higher Secondary School 92%	2019-2021
SSLC - Sri Visalakshi Girls Higher Secondary School 90%	2018-2019

PROJECTS

Weather App

Developed a dynamic web application to deliver real-time weather information for user-specified locations. Leveraged modern React features and popular libraries to create an interactive and responsive user interface. The app provides detailed weather forecasts, offering a streamlined and user-friendly approach to accessing weather data.

Technology Used: React JS, Material-UI, OpenWeatherMap API

Banking System

Developed a console-based banking system designed to simulate core banking operations. The project focused on implementing fundamental Java programming concepts, such as object-oriented principles and basic file handling, to create a user-friendly and functional application.

Technologies Used: Java, Object-Oriented Programming (OOPS)

Charge Pump

Designed and implemented a high-efficiency charge pump circuit aimed at voltage regulation in low-power applications. This project focused on voltage conversion, specifically voltage doubling, using capacitors and switches. Powered by a 5V DC supply, the circuit effectively multiplies the input voltage, achieving an output voltage ideally twice the input across capacitor C2.

INTERNSHIP

MERN STACK - BETTER TOMORROW 2023

I completed an internship in MERN stack, where I gained hands-on experience in web development using HTML, CSS, JavaScript, and React.
